SUMMARY

I bring a strong foundation in both front-end and back-end web development, specializing in technologies such as Python, Django, Flask, and WordPress. As a Junior Web Developer, I have developed responsive, user-focused websites, leveraging my skills in creating efficient, scalable applications. During my experience as a Full-Stack Intern, I honed my expertise in both server-side and client-side development, utilizing frameworks like Django and Flask to build dynamic and robust web applications. Committed to continuous learning and agile teamwork, I focus on crafting web solutions that enhance user experience and meet business objectives.
